Project Name	Smart Fashion Recommendation Application

## Creation of Chatbot:

The screenshot displays the IBM Watson Assistant web interface. The browser address bar shows a URL from `au-syd.assistant.watson.cloud.ibm.com`. The page title is "IBM Watson Assistant Lite". The main navigation bar includes "Upgrade" and "Smart Fashion". The "Actions" section is active, showing a list of actions created by the user. A table lists the actions, with one action named "Smart Fashion" having 12 examples and a status of "checked". A "New action" button is visible. A sidebar on the left shows the "Actions" menu. A bottom status bar indicates the system is training.

## Integration of Chatbot with HTML web page:

The screenshot displays the IBM Watson Assistant Lite interface for configuring a chatbot named "Smart Fashion". The interface is divided into three main sections:

- Conversation steps:** A list of steps to define the chatbot's logic. Step 1 asks for the customer's first name, Step 2 asks for the last name, and Step 3 asks for an email address. Each step includes a "Continue to next step" button and a "Free text" input field.
- Customer starts with:** A section where phrases that trigger the chatbot's actions are entered. The total number of phrases is 12. The phrases listed are: "Enter a phrase", "I would like to discuss my situation face to face", "I want to talk in person with someone about my case", "Is it possible to set a date?", "Looking for a dress", and "Suggest me a dress".
- Preview:** A section showing a simulated conversation with the chatbot. The chatbot's responses are: "To set up a meeting, I'll need a few details. First, what's your first name?", "I'm afraid I don't understand. Please rephrase your question.", "To set up a meeting, I'll need a few details. First, what's your first name?", and "Thanks! And what's your last name?".

The interface also includes a "New step" button and a "Learning center" link.

The screenshot displays the IBM Watson Assistant Lite interface for previewing the chatbot's integration into a web page. The interface is divided into two main sections:

- Preview assistant:** A section showing a simulated conversation with the chatbot. The chatbot's responses are: "To set up a meeting, I'll need a few details. First, what's your first name?", "I'm afraid I don't understand. Please rephrase your question.", "To set up a meeting, I'll need a few details. First, what's your first name?", and "Thanks! And what's your last name?".
- Web page preview:** A section showing a simulated web page with the chatbot integrated into it. The web page features a background image of a man in a denim jacket standing in a flower shop. The chatbot is displayed as a floating window on the right side of the page, with the same conversation history as the "Preview assistant" section.

The interface also includes a "Copy link to share" button, a "Change background" button, and a "Customize web chat" button.
